WHAT'S HAPPENING @PCC

New windsock made by Ken Martinez, proudly displayed at the Richardson Field. After the old one destroyed by the weather, Ken took a look and said, "I can make one." Two weeks later, it was up, to "sock" the wind! Thanks, Ken!

????????

Sometimes the camera captured some strange activities, such as this one.

Here is the explanation from "Deadstick" Dave,

"I want the club members to begin practicing Tai Chi before they fly. It will help them relax and focus on their flying."*

**Tai Chi is an internal Chinese martial art practiced for both its defense training and its health benefits.*

Perfect example, a little more Tai Chi would have prevented this perfect "dead stick" landing!!

Holy smoke! The beautiful skywriter belongs to Ray G.

Maurice with Multiplex Acromaster.

Greg with Mountain Models PeregrinE Micro, rudder and throttle control. *(And he managed to get the rudder reversed on the maiden flight, only one control!)*

The Pres, Mike flying his plane!

Bruce D's Skywing, an electric tow plane for gliders.
